

Keep your employees safe from infection and your business premises fully operational.

Aparidion provide a safe, controlled and highly effective biological decontamination and infection control service for workplace disinfection and infection prevention.

Our two-step process delivers innovative electronically charged sanitisation against all known viral and bacterial threats, protecting employees, limiting transmission and minimising business disruption.

Step 1: Touch Point Surface Sanitation

- Wiping of all touch points including switches, door handles, taps, toilet handles, phone receivers, trollies, keypads, handrails etc
- Cleaning of hard floors & carpeted areas
- Breaks down viruses & leaves residual protection
- Safe for food surfaces

Step 2: Electrostatic Spraying

- Touchless delivery of electrically charged disinfection and decontamination solution for a high degree coverage
- Ensures all contagions are removed from the air
- Treats hard-to-reach surfaces & spaces
- Non-corrosive & no residue
- Fast & unobtrusive

SAFE & SUITABLE FOR ALL BUSINESSES

- ✓ **Occupied & vacant properties** - offices, schools, colleges, commercial & public buildings
- ✓ **Industrial & production settings** - including water treatment & food production
- ✓ **Construction environments** –cabins, washrooms, canteens & rest areas
- ✓ **Vehicles** – cars, vans, public transport & aircraft
